

OUTDOOR OPERABLE GLASS ENCLOSURES

GLIDE

FRAMELESS MULTI SLIDE

ENCLOSURE + PARTITIONS

GLIDE isn't just a door system; it's your key to redefining breathable and connected spaces.

- Stylish Elegance: Frameless sliding glass panels that become true gateways to comfort and sophistication.
- Effortless Operation: Panels designed to glide smoothly, making every interaction intuitive and easy.
- Unmatched Durability: Built to withstand the demands of high-traffic spaces while maintaining timeless beauty.

GLIDE

Effortless Operation, Unmatched Durability

Where form meets function, GLIDE is the ultimate solution for new and existing spaces.

- Commercial Hustle: Elevate dynamic spaces with sleek, modern designs that impress.
- Residential Tranquility: Enhance homes with serene, seamless transitions to the outdoors.
- Architectural Grade Materials: Constructed with 6060 architectural grade extruded aluminum and powder coated to AAMA 2604 standard, the GLIDE system guarantees durability and a superior aesthetic appeal, important for both residential and commercial applications.

GLIDE

Beyond Enclosure – It's a Lifestyle Upgrade

- Transforms homes into tranquil retreats.
- Creates a seamless connection between your indoor living area and the great outdoors.
- Not just a patio enclosure, but a pathway to an elevated lifestyle.

GLIDE

A Gateway to Versatility

- Perfectly suited for both commercial dynamism - create separate event spaces
- Transforms frameless sliding glass panels into more than just doors – they're design statements
- Customizable Dimensions: The GLIDE system offers panels in sizes up to 1219 mm wide and 3048 mm high, supporting a maximum weight of 100 kg, which allows for significant flexibility in design and space utilization..

GLIDE

Reliable Solutions

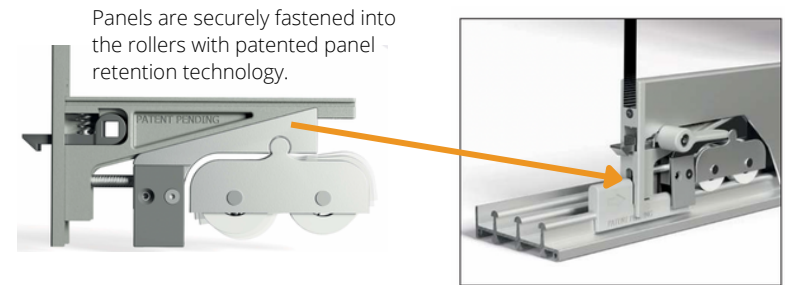

- **Enhanced Accessibility:** The option for a flush sill provides a seamless transition, enhancing accessibility—a critical feature for commercial spaces and beneficial for residential settings to meet various regulatory requirements.
- **Security and Safety Features:** The anti-lift mechanism prevents unauthorized panel removal, offering a robust security feature that adds to the safety of the installed environment.

GLIDE

Safety and Security

For enhanced security and safety, the glass panels incorporate an anti-lift mechanism that effectively prevents any attempt to lift them out. This mechanism ensures a robust and reliable restraint against unauthorized removal of the panels.

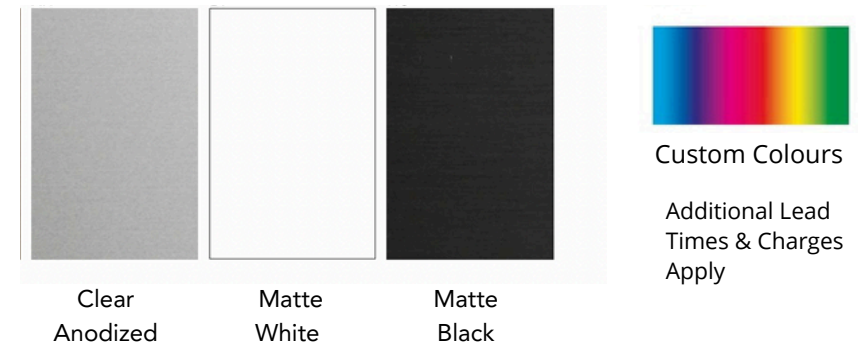

- Panels up to 1219 mm wide (4ft) and 3048 mm high (10ft), with a max panel weight of 100 kg (220 lbs).
- The Frameless Multi Slide Glide has 2,3,4 or 5 Track options for multiple configurations. Systems can accommodate sliding in one direction, or bi-parting for sliding away in two directions.
- Integrated handles, that seamlessly are installed into the glass panels to create a minimal look and easy operation.
- The profiles of the FMS Glide system are composed of 6060 architectural grade extruded aluminum.
- Different sill options to compliment and suit different installation scenarios. Flush sill available for a seamless transition.
- The system can accommodate single pane 10 mm glass.

Sleek locking system integrated in the bottom of the system.
