

outdoor kitchen

stationgrill.ca

An aerial view of a modern outdoor kitchen and dining area. The kitchen features a long island with a white marble countertop and dark grey cabinetry. On the island, there is a stainless steel sink, a four-burner gas cooktop with a pot on it, and a large stainless steel grill with a warming rack. A dining table with a matching marble top is set for three people with white plates, silverware, and glasses. The patio is paved with light grey stone tiles, and there are green plants and a brick wall in the background.

is not just our passion,
it's our purpose.*

ENJOY EVERY MOMENT SPENT OUTDOORS

Station Grill is a Canadian company that offers high-end, durable, and low-maintenance products. All our outdoor kitchens, small and large, are designed and built with precision, originality and in harmony with your living space.

Station Grill offers high quality products that blend artfulness and elegance to bring you unique and original designs that will add the final touch to your home.

To have our signature, a product must be at the cutting edge of design, creativity and innovation. Thus, we pour all of our expertise into building outdoor kitchens that fit your needs.

Collection: LUX / Eclipse

RESORT - STYLE LUXURY

This outdoor kitchen is truly worth a resort. It offers both efficiency and elegance for perfect summer days by the lake. The linear configuration combines high-end features with sophisticated design, making it ideal for entertaining and culinary excellence.

THE HEARTH OF YOUR OUTDOOR SPACE

This spacious U-shaped kitchen was designed to perfectly meet the family's needs. It features a Kamado Joe, a premium grill, and side burners, offering versatile cooking options—from slow-smoked meats to sauces and pasta. Thoughtfully planned, this kitchen enhances both functionality and togetherness in their outdoor space.

OUR COLLECTIONS

Every customer has their own style and needs. That's why Station Grill offers five collections of colors and materials, specifically designed for cabinet facades—the doors and drawers that define the look of your outdoor kitchen.

PUR

Our PUR Collection is crafted from marine-grade high-density HDPE a highly weather-resistant material. Designed for outdoor performance, the polymer panels feature beveled edges and a lightly textured finish.

CLASSIC

The CLASSIC Collection is also made with HDPE and stands out with its distinctive “V” grooves. This design detail gives it a timeless shaker-style look, blending elegance with durability for a classic outdoor kitchen aesthetic.

EVO

Introducing EVO, our newest collection, crafted from NEXBOND™ panels with all the benefits of aluminum. Its frame-less design creates a sleek, modern look that elevates your outdoor space.

LUX

The LUX Collection features a NEXBOND™ panel set within an anodized aluminum frame. Available in a matte finish, LUX delivers a sophisticated, high-end look while ensuring durability in any outdoor setting.

NATUR

The NATUR Collection recreates the warmth of wood with a satin-finish. Designed for low maintenance, it features a fusion process that bonds a polymer layer to a PVC core, ensuring long-lasting performance.

SIGNATURE PANELS

The Signature panels are 2¼ inches wide and used to add the finishing touch on every Station Grill outdoor kitchen. Made of NEXBOND™, they delineate the cabinets nicely and create a recess to protect the front of the doors from inclement weather.

EXTERIOR FINISHING PANELS

Designed for both function and aesthetics, these 4½ inch-wide panels with toe kick allow seamless integration of electric, gas, and water lines within your outdoor kitchen. Crafted from NEXBOND™, they offer a maximum width of 84 inches, ensuring minimal seams for a sleek and polished look.

nexBOND™
PVDF • NANO TECHNOLOGY

Station Grill proudly presents NEXBOND™, our latest innovation in aluminum composite panels, engineered to seamlessly match all solid colors in our collections for a cohesive and refined outdoor kitchen design.

More than just aesthetics, NEXBOND™ features matte architectural-grade PVDF paint and an advanced Nano technology finish, enhancing durability while making maintenance effortless. Its innovative surface resists dirt and stains, keeping your outdoor kitchen looking pristine with minimal effort.
